#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 28-29, 33-34, 36-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In this instance the newly added claims recite different path for reading different from a path for storing.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 21-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Ino et al (JP 2000-180127) or alternatively under 35 U.S.C. 102(e) as being anticipated by Ino et al (US Patent Publication 20020066859).

Application/Control Number: 10/807,181

Art Unit: 1763

Ito et al disclose a semiconductor processing apparatus comprising a chamber to process a sample wafer (Fig 31), first data storing device (542), a second data storing device (543), each receiving and storing data from the chamber during processing (Paragraph 207), selecting device which selects the data received by the storage devices (550) and data analyzing device (550) capable of diagnostics. Further as both memory locations (storage devices) can independently store or retrieve data they could be used simultaneously to store or read (Paragraph 208 and 213) and attached or detached (using or releasing memory).

Regarding claims 21-23 the use of memory locations for a specific purpose is a functional limitation and is not patentable in an apparatus claim. It has been held that the manner in which an apparatus operates is not germane to the issue of patentability of the apparatus itself. *Ex parte Wikdahl* 10 USPQ 2d 1546, 1548 (BPAI 1989); *Ex parte McCullough* 7 USPQ 2d 1889,1891 (BPAI 1988); *In re Finsterwalder* 168 USPQ 530 (CCPA 1971); *In re Casey* 152 USPQ 235, 238 (CCPA 1967).

Regarding claims 30, 35, 37 and 38, Ino et al further teach that the control section (560) controls the film forming process on the basis of the arithmetic section (analyzer) (Paragraph 206).

Regarding path for storing and retrieving data, these are computer architecture dependent and inherently independent of each other.

### Response to Arguments

Applicant's arguments filed 12/22/2005 have been fully considered but they are not persuasive.

Application/Control Number: 10/807,181

Art Unit: 1763

Applicant argues that the Examiner has mischaracterized the disclosure of Ino et al without describing the specific instance except noting that Ino et al does not operate in the manner contended by the examiner. As discussed earlier in this office action the manner of operation is not germane to the issue of patentability.

Applicant further argues that an arithmetic section is not an analyzing device in the manner of the operation according to the claim.

Applicant has relied on the manner of operating the apparatus in arguing against the reference which as noted earlier is not a standard for determining the patentability of the apparatus.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
